PROFILE

Adaptable Computer Engineer working in both front-end and back-end development, creating user-friendly web apps for enhanced experiences. Ready to thrive in an innovative tech environment.

EXPERIENCE

Digital Payment System *August 2022 — April 2023*

Thesis Project

- Collaborated with a team of developers to design and implement a digital payment system for our school, marking my first foray into full-stack web development.
- Overcame numerous technical challenges, demonstrating problem-solving and adaptability.
- Gained hands-on experience in both front-end and back-end web development.
- Worked effectively with team members to ensure project success.

On-the-Job Training *June 2022 — August 2022*

Under Senior Web Developer of BookBrush

- Played a pivotal role in front-end web development, working on a web component to be implemented.
- Participated in code modification and conversion of legacy code, gaining a deep understanding of developer challenges and best practices.

Videographer & Video Editor *August 2021 — October 2021*

Digital Campaign Team

- Successfully produced and edited videos to fulfill campaign objectives for a local politician, showcasing my creativity, and attention to detail.
- Developed strong collaborative skills within a corporate-like environment, fostering effective teamwork and adaptability.

Basic Retail Inventory System *2021*

School Project

- Designed and developed a retail inventory system as a school project.
- Applied strong logic and coding skills to create a functional system, demonstrating proficiency in programming.
- Utilized SQL to manage and retrieve data, expanding database expertise.
